Early Landscapes Of Myanmar

Synopsis

This book compares changing landscapes in Myanmar from the Paleolithic and Neolithic through the rise of bronze-iron chiefdoms and the emergence of first millennium AD Hindu-Buddhist walled polities. Throughout this sequence, contrasts between the arid north and well-watered southern coasts framed complementary and changing

Customer Reviews

The Archaeology of Mainland Southeast Asia: From 10,000 B.C. to the Fall of Angkor (Cambridge World Archaeology) All the books of this author are of great quality as well with regard to the written information as with regard to the photographic aspect. This and the fact I am particularly interested by the archaeology and architecture of Myanmar were the reasons I bought this book. In fact it is a complete study of the archaeological findings in Myanmar containing clear descriptions and quality photographs. After reading this book I am convinced to return to Myanmar to visit some sites (for example Sriksetra) more profoundly so as to understand better the archaeological richness of this part of the world.

This is a great reference book and the seller gets an A+ for waterproof and damage proof packaging. I was very satisfied and impressed.
