Cases In Healthcare Finance, Fifth Edition

Synopsis

With this casebook, students have the opportunity to apply finance principles and concepts to settings that simulate actual work environments. In that way, the book allows instructors to create a bridge between academic learning and applied practice. Each of the 32 finance cases presents relevant background on a healthcare organization, along with a financial management decision that students must analyze and then recommend appropriate courses of action. The majority of cases are accompanied by spreadsheet models to help students perform the required analyses. The casebook also contains seven qualitative mini-cases created to highlight the ethical dilemmas that occasionally arise in the practice of healthcare finance. Important changes to this edition: All cases have been updated, and many have been revised extensively, including new exhibits, timely topics, and new calculations. Two new cases have been added to the book: one focuses on bond refunding while the other covers revenue cycle management. A new mini-case has been added that focuses on the potential ethical conflicts involved with physician-owned distributors (PODs). The PowerPoint slides have been changed to allow instructors to first present a short introduction to the case and then, after students have completed their analyses, review each case by discussing three key learning points.

Book Information

Paperback: 243 pages

Publisher: Health Administration Press; 5 edition (December 4, 2013)

Language: English

ISBN-10: 1567936113

ISBN-13: 978-1567936117

Louis C. Gapenski, PhD, is a professor of health services administration at the University of Florida

with a specialization in corporate and healthcare finance. He is the author of 30 textbooks on corporate and healthcare finance. His books are used worldwide and include Canadian and international editions as well as translations in eight languages. He has published 40 journal articles related to corporate and healthcare finance and is active in several professional associations. George H. Pink, PhD, is the Humana Distinguished Professor in the Department of Health Policy and Management, Gillings School of Global Public Health, at the University of North Carolina at Chapel Hill (UNC) and is a Senior Research Fellow at the Cecil G. Sheps Center for Health Services Research at the university. Prior to receiving a doctorate in corporate finance, he spent ten years in health services management, planning, and consulting.

Concepts are explained well enough, but calculations are confusing as multiple parameters in each example have the same numerical value and it is hard to discern which parameters are used: For example value of SD equals the value of Average and the value of NPV and it is not clear which one should be used and when.

I rented this book for my Advanced Financial Management course for my masters program. Good book! Good supplemental information to the actual text.

Excellent detailed problem sets relating to healthcare finance. Should be used with another reference text, but provides good information and challenging problems.

More complex than it needed to be for my purposes, instructions not always clear.

For a textbook, this was a good book! At the right level to engage, push, and learn from. The examples and text were supportive of the work being covered and assisted in understanding the subject. Spend the time to read, review, and walk thru the examples and you'll master the subject.

I liked this book because its in great condition.

Did not use book. Cases outdated!

It would have been nice to experience all the situations in the case studies on an ongoing basis than just at the end of the semester. There was no time to familiarize with the contents or assignments to

complete on the book.
