Eustace Hazard Livingston is considered one of the premier experts on the history of hunting and trapping in the northeastern United States. His family has roots going back generations in rural Vermont and New Hampshire, and grew up until the tutelage of area-renowned trappers. *The Trapper's Bible* is his first book, culled from a significant personal library on the subject.

Collection of very old articles that are in dire need of editing and updating. I returned it for a refund.

the book covered most concepts and had much good information. it would be great if someone

would publish a more modern edition with up dated photos instead of using the same photos from , what appears to be the 1890s. but still the information is great

Needs to be re-edited and written with modern language. Otherwise look at some good information and techniques that really aren't used today but could be if you wanted to use traditional methods and not pay for modern traps.

Great reference book to have if you are into prepping or bushcraft, survivalist etc.....

More of a novelty. Not at all what I expected you get.

very good info that you may need

Fun read

Great reference book for my outdoor/survival skills. would really like it in a more "pocket sized" version...
