Chris Pye has been a professional woodcarver for than 25 years and is a member of the Master Carvers Association. His work is done mainly to commission, with clients including HRH the Prince of Wales. It ranges from architectural moldings to figure carving, furniture to lettering, bedheads and fireplaces. He has also written extensively about woodcarving for several magazines.

It's gotten a little dated. The extra that were downloadable are no longer available. It's not much good as a course guide if the patterns aren't available. You will probably will learn more by watching the numerous YouTube videos available for wood carving.

A very good beginners book. I decided a while back that I wanted to learn to hand carve. This book had great instructions and photos. My first piece turned out better than would have thought.

This book gives a really good foundation with information about tools, types of wood, and different methods of carving, as well as projects & patterns to help you get started. Chris Pye is (in my opinion) an amazing craftsman and artist, and even if you don't carve, looking at the photos of his process and the finished pieces is a great experience. The only thing better would be if the book came with an instructional DVD of some kind, because it can be challenging to make sense of a 3-d or "in the round" project from written instructions and photos. I would absolutely recommend this book for anyone interested in learning more about carving!

Great book!

Very wordy without really giving me the nitty-gritty of what is needed to wood carve.
