Potential Invasive Pests Of Agricultural Crops (CABI Invasives Series)

Synopsis

Invasive arthropods cause significant damage in agricultural crops and natural environments across the globe. Potentially threatened regions need to be prepared to prevent new pests from becoming established. Therefore, information on pest identity, host range, geographical distribution, biology, tools for detection and identification are all essential to researchers and regulatory personnel. This book focuses on the most recent invasive pests of agricultural crops in temperate subtropical and tropical areas and on potential invaders, discussing their spread, biology and control.

Book Information

Series: CABI Invasives Series (Book 3)

Hardcover: 496 pages

Publisher: CABI (August 1, 2013)

Language: English

ISBN-10: 1845938291

ISBN-13: 978-1845938291

Product Dimensions: 1.2 x 7 x 9.8 inches

Shipping Weight: 2.6 pounds (View shipping rates and policies)
