Customer Reviews

Apparently the author wrote this just in order to make money. Very little worthwhile to be found in it, and even the grammar used is rather poor.

I expected more

Very informative book

The information is too general to be of much use. You can sell used video games but you need to know which ones to sell. No hints or clues as to which ones to look for. Most of the information is this vague.

The author keeps it simple. Gives you a starting blueprint. I was really impressed with all the secrets let out of the bag. Highly recommended.

This book has good information, but is difficult to read due to poor editing, and many grammar/sentence structure mistakes.

This book give you a good idea of some good items to sell if you are new to selling online. I was expecting more details and maybe some sale number. Is short and sweet and at least should give you some ideas of items to sell.
