# Foundations Of Aural Rehabilitation: Children, Adults, And Their Family Members

## **Synopsis**

FOUNDATIONS OF AURAL REHABILITATION: ADULTS, CHILDREN, AND THEIR FAMILY MEMBERS, 4th Edition introduces the fundamentals of rehabilitative audiology and hearing-related speech-language pathology in an easy-to-read style, along with concrete suggestions that help you deliver high-quality services. Designed for both classroom learners and as a reference for seasoned professionals, this widely-used book entwines theory with clinical practice, and presents research-based information for identifying, diagnosing, and treating hearing and communication-related disorders. Important topics include patient-centered services, counseling, selection and fitting of listening devices, conversational fluency and communication strategies training, auditory training, speechreading, and language and speech promotion. Divided into sections to cover adult and child populations separately, the book distills readings into important "Take Home" points, and illustrates with representative research reports, case studies, example procedures, and lively figures. Text box inserts, sidebar bullet points, tables, and quotes from professionals and patients also pique interest, along with key resources and appendices for clinical practice or self-study.

## **Book Information**

## **Customer Reviews**

Nancy Tye-Murray is a professor in the Department of Otolaryngology at Washington University School of Medicine in St. Louis, and an Adjunct Professor at New Zealand's University of Canterbury. A founder of the University of Iowa Cochlear Implant Aural Rehabilitation Programs, she also served as Director of Research for Central Institute for the Deaf. In addition to developing

several communication strategies training programs, auditory training programs, and speechreading tests, Dr. Tye-Murray is the principle investigator of three National Institutes of Health RO1 grants. Her research focuses on the effects of aging on audiovisual speech recognition, discourse comprehension, and auditory training, as well as audiovisual speech processing by children who have normal and impaired hearing. The author of six books and more than 100 peer-reviewed research papers, Dr. Tye-Murray is also a popular speaker both nationally and internationally.

Excellent resource

Needed it for class and it was at a cheap price!

Great book for learning about aural rehab.

Perfect condition!

Very informative and easy to understand. I'm keeping this book for future reference!

Just what I needed and received this in a timely manner.

Soooo out dated. Never should have ordered this book.

Pictured different book.
