JAKE PERRINE began making bleeps and bloops with computers on an Apple II+ when he was 12. He has been an audio engineer for Real Networks and a mastering engineer at RFI/CD, and has taught professional audio production for over a decade at the Art Institute of Seattle. He has written and directed a rock opera entitled Vamp, releases his own solo electronic music under the name

Spire, and is half of the electropop duo Bloom.

This book is written in a way that you can uncover the power of Ableton without having to go to the boring online user manual. But this book is certainly not a reference, for the most part you need to go through the book sequentially. That said, I found it pretty helpful.

Excellent book, easy to follow with applicable exercises as you progress. Loaded CD is also included, don't have to download a thing. THANK YOUUUU!!!

Brilliant overview of the impossibly endless learning you can delve into in Ableton 9! Mr. Perrine definitely knows his way around the kitchen and what spices to use while still writing a more user friendly, understandable approach to learning your way around Ableton. I only wish he would update it for the new features that came with 9.5 suite. But, then again, no one could have seen those awesome features coming! Cheers, Mr. Perrine! My only regret is that I bought the book online and missed out on the extra disc!

Good companion book to "Producing Music with Ableton Live 9"

good

Really helpful! Just as described so highly recommended for those who would like to start in the field

This book is a waste of time and money. Doesn't even help with mixing/mastering. This is just an educational book on how Ableton Live 9 functions. Don't waste your money!

a DVD would be better please...
