# Characterization Of Remote-Handled Transuranic Waste For The Waste Isolation Pilot Plant: Final Report (Compass Series)

## Synopsis

The U.S. Department of Energy (DOE) disposes of plutonium-contaminated debris from its 27 nuclear weapons facilities at the Waste Isolation Pilot Plant (WIPP), an underground repository in Carlsbad, New Mexico. After four years of operational experience, DOE has opportunities to make changes to the costly and time-consuming process of "characterizing" the waste to confirm that it is appropriate for shipment and disposal at WIPP. The report says that in order to make such changes, DOE should conduct and publish a systematic and quantitative assessment to show that the proposed changes would not affect the protection of workers, the public, or the environment.

## Book Information

Series: Compass series

Paperback: 132 pages

Publisher: National Academies Press (September 28, 2002)

Language: English

ISBN-10: 0309084601

ISBN-13: 978-0309084604

Product Dimensions: 8.5 x 11 inches

Shipping Weight: 11.2 ounces (View shipping rates and policies)
