Scotland Classic [Laminated] (National Geographic Reference Map)

Synopsis

National Geographic's wall map of Scotland is one of the largest and most detailed maps of the country. The signature Classic style design uses a bright, easy-to-read color palette featuring blue oceans and stunning shaded relief that has been featured on National Geographic wall maps for over 75 years. This map includes hundreds of named places including primary and secondary towns, counties, political boundaries, infrastructure, and selected historical sites. Scotland is shown in its entirety including the Highlands, Southern Uplands, Isle of Skye, Outer Hebrides, Inner Hebrides, Orkney Islands and the Shetland Islands (shown in an inset map). The nine political council areas of Scotland are also clearly identified. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:650,000 Sheet Size = 30" x 36"

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

While I cannot comment upon the geographical accuracy of this map, I can comment upon its looks--which is why I got it (and of course, because I am a Scot). I saw a picture where maps were used to cover the panes of interior glass doors, to give privacy. Bought this for this reason. I bought a couple more for the same purpose that did not come close to the good looks and quality of this one.

Good size to highlight the entire tour I took. Only problem now is how to hang it. I want to add all the fridge magnets I bought so I need to put a metal back on it. Also shows me where I should go to next.

I had it framed at Hobby Lobby, then I taped some #10 can lids on the back of the map & bought neodymium pushpin style magnets. Now instead of paying \$300 for a magnetic map, (yes, that's what they cost) I made my own for \$70. Let the geography lessons begin :)

If you are looking for a map that shows the general geography of Scotland, the main roads and highways, and one that you can write on and then erase, this is great. It's not as good if you are looking to plan a rail vacation.

A National Geographic map. Nothing more has to be said.

Very good addition to our Clan Tent for the Highland Games.

I love having this for planning y trip to Scotland. I put it on my wall.

It's our second one. The first is in our home, and this one is for our son and daughter-in-law's home so we can both be looking at the upcoming trip!
