Cyber Spy Hunters! (Scientists In Action)

Synopsis

Hackers are out to get you . . . but these experts are on the job to stop them! Cybercrime is a growing problem, affecting businesses, governments, and individuals. A growing number of computer wizards are using science to prevent crime . . . or track down the cybercriminals. Visit this secret world inside! Every book in the SCIENTISTS IN ACTION! series takes you on a journey where science and adventure meet. Science is not just for the classroom or the labits a living, breathing, exciting part of our world today. Throw off that lab coat and get out and do some science! Each title in this series contains color photos, insider quotes from real scientists in the field, recent news items highlighting the excitement of each field, and back matter including: an index, further reading lists for books and internet resources, and a series glossary. Mason Crests editorial team has placed Key Icons to Look for throughout the books in this series in an effort to encourage library readers to build knowledge, gain awareness, explore possibilities and expand their viewpoints through our content rich non-fiction books. Key Icons are as follows: Words to Understand are shown at the front of each chapter with definitions. These words are then used in the prose throughout that chapter, and are emboldened, so that the reader is able to reference back to the definitions- building their vocabulary and enhancing their reading comprehension. Sidebars are highlighted graphics with content rich material within that allows readers to build knowledge and broaden their perspectives by weaving together additional information to provide realistic and holistic perspectives. Text Dependent Questions are placed at the end of each chapter. They challenge the readers comprehension of the chapter they have just read, while sending the reader back to th

Customer Reviews

Gr 5-9-This informative set immerses students in various STEM-related careers, both familiar and lesser-known. After a preliminary "Action!" chapter introduces readers to the field, each volume subsequently and thoroughly addresses educational requirements ("The Scientists and Their Science"), equipment ("Tools of the Trade"), and examples ("Tales from the Field" and "Scientists in the News"). Text-dependent questions and critical thinking activities conclude each chapter. The scientists are depicted as real-life superheroes, and their prowess is reflected in the graphics, which include comic book lettering and sidebars in the shape of speech bubbles. Although rich in content and design, the series is not without fault: a few incorrect examples-it was Louis Leakey, not Richard, whose illness resulted in his wife's solo outing and subsequent discovery of a hominid skull fragment; the goldsmith in the Archimedes gold crown myth tried to pass silver off as gold, not "some of the gold off as silver"-mar the set. VERDICT Despite a few blemishes, this is first-rate nonfiction for educational or recreational reading.Â (c) Copyright 2011. Library Journals LLC, a wholly owned subsidiary of Media Source, Inc.
