Water Security: Principles, Perspectives And Practices (Earthscan Water Text)

Synopsis

The purpose of this book is to present an overview of the latest research, policy, practitioner, academic and international thinking on water security. It is an issue that, like water governance a few years ago, has developed much policy awareness and momentum with a wide range of stakeholders. As a concept it is open to multiple interpretations, and the authors here set out the various approaches to the topic from different perspectives. Key themes addressed include: Water security as a foreign policy issue The interconnected variables of water, food, and human security Dimensions other than military and international relations concerns around water security Water security theory and methods, tools and audits. The book is loosely based on a masters level degree plus a short professional course on water security both given at the University of East Anglia, delivered by international authorities on their subjects. It should serve as an introductory textbook as well as be of value to professionals, NGOs, and policy-makers.

Book Information

Series: Earthscan Water Text

Paperback: 376 pages

Publisher: Routledge; 1 edition (December 4, 2013)

Language: English

ISBN-10: 1926692640

ISBN-13: 978-1466582521

ASIN: 0415534712

Product Dimensions: 6.1 x 0.8 x 9.2 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)

Customer Reviews

"Lankford, Bakker, Zeitoun and Conway have put together the best collection on the subject of water security I've ever read." Lawrence Susskind, MIT, in Anthem

EnviroExperts Review "One of the most useful models in the book is a web of sustainable water

security including climate security, national security, water resources security, energy security and food security. One can readily appreciate that a dynamic systems approach is required to manage this kind of complexity, and indeed one of the contributions is specifically devoted to water security for ecosystems in terms of optimum allocation." Åââ David Lorimer, Network Review

Bruce Lankford is Professor of Water and Irrigation Policy in the School of International Development at the University of East Anglia, UK. Å Å Karen Bakker is a Professor in Geography, Canada Research Chair in Political Ecology, and Director of the Program on Water Governance at the University of British Columbia, Canada. Å Å Mark Zeitoun is a Reader in the School of International Development at the University of East Anglia, UK, and co-Director of the UEA Water Security Research Centre. Å Å Declan Conway was, at the time of writing, Å Å Professor of Water Resources and Climate Change in the School of International Development at the University of East Anglia, UK.
