# Flow Cytometry, Immunohistochemistry, And Molecular Genetics For Hematologic Neoplasms

## Synopsis

Immunophenotyping is the most powerful tool in the routine diagnosis of hematologic neoplasms. Immunohistochemical technique is used in histology labs for this purpose, while flow cytometry is used in clinical labs. While separately these 2 techniques are very useful in detecting lymphomas and leukemias, the combination of both creates a very powerful and definitive diagnostic tool. The addition of molecular genetics to the book will make it an all-encompassing reference text.

## Book Information

Hardcover: 432 pages

Publisher: LWW; Second edition (November 25, 2011)

Language: English

ISBN-10: 1608316165

ISBN-13: 978-1608316168

Product Dimensions: 8.6 x 0.9 x 11.1 inches

Shipping Weight: 3.2 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #525,550 in Books (See Top 100 in Books) #62 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Hematology #96 in Books > Medical Books > Medicine > Internal Medicine > Hematology #205 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Oncology

## Customer Reviews

“tables concisely highlight the pertinent points in the text”; “the combination of flow cytometry, immunohistochemistry, and molecular techniques makes this book a powerful reference text”; “images are high quality and help illustrate the case”; “presents expertly detailed case studies in neoplastic hematology”; “excellent and appropriate for hematopathologists and residents as well as astute technicians”; Nadine Aguilera, MD  
University of Virginia, Charlottesville, VA American Journal of Surgical Pathology, June 2013 -  
Volume 37 - Issue 6 - p946

Great Book must have and Read
