Penetration: The Question Of Extraterrestrial And Human Telepathy

Synopsis

Ingo Swann - renowned psi researcher - reveals a long-held secret series of experiences with a "deep black" agency whose apparent charter was simple: UFOs and extraterrestrials on the moon and worries about ET telepathic/mind control powers. The agency was so secret that it had no paper trail, and hence no written secrecy agreements. Only the verbal ones, which in Ingo's case expired several years ago. Now, in this era of burgeoning UFO "glasnost," he tells a story of meetings held in a secret underground facility not far from Washington DC, and of being taken to a remote location near the Arctic Circle to witness the expected arrival of a huge UFO over the surface of an Alaskan lake. This book discusses undeveloped human telepathy and contrasts it with the probable existence of fully developed alien telepathy, which may have many different forms. Ingo also explores the fact that we officially know far more than we're admitting about the moon - its origins, its atmosphere, its occupants and many other unusual features. Penetration is about one of the means by which we can learn more about those not of this earth (and vice-versa) - telepathy. Do we have the means to answer some very important questions that many have been asking for quite a long time? Inside this book are the answers to some.

Customer Reviews

Ingo Swann is much mentioned by other authors (especially Joseph McMoneagle) when discussing the government's remote viewing projects (Stargate etc.). Therefore he starts with a certain amount of credibility as someone who actually impressed many others with real ability. The first part of this

book is a 1st person account of some interactions he had with government functionaries who had some responsibilities in regards aliens on earth as well as the moon. It is great, gripping reading the tradition of sci fi masters, albeit without the marks of fiction (no huge conflict here, only a mystery...). Ingo just talks about what happened to him and how he felt about it. You can read it as you like (as fiction, you'll like it well enough), or as non-fiction (more evidence on that great pile Ingo talks about in the second half). As noted by another reviewer, the second half of the book is a lot less than the first half... not 1st person (except in the sense that it is Ingo surmising, speculating, theorizing, etc.). The only value really is that it is Ingo Swann, not some BillyBob presenting a book-report, that is doing the speculating. Still it's only worth 3 stars. So I gave it 4 stars as a weighted average. Don't skip the 1st half. It's really excellent. If you just want to skip the 2nd half, it has a bit of a book-report wherein Ingo confirms his RV investigations of the moon in the 1st half, and goes on to propose among other things that 1) the US government knows that the moon (and earth) have lots of higher powered aliens running around doing alien things that are (???) a potential threat to people (???) and therefore some kind of close monitoring is required, 2) Of course this can't be talked about and hence all misinformation tactics are fair game, 3) the USG (and space-side aliens) would like to suppress broad ranging telepathy research, because it would compromise 2), and 4) as a result of no appropriate research, we don't know much about telepathy, except that it does not seem to work single mindedly, i.e. I will have a very hard time reading your thoughts, all other things being equal. Ingo proposes that other modalities are much more likely to be manifest than 1 to 1 'telepathy', although in a fairly weak form it is well enough documented by others (for an interesting video see "Michael Persinger No More Secrets" on youtube). If this subject interests you, you might also find the Researchers of Truth concepts of 'elementals' and other sources (even Eckhart Tolle) that talk about 'thought-forms' are helpful in understanding the situation that Ingo comments on in the 2nd half of the book. Ingo is not aware of this other work (or doesn't mention it), and uses his own language to frame these things, perhaps providing a bit of supporting evidence (the view of one person with demonstrated RV skill) but not much more.

Well Done! The first section had me on the edge of my seat, breathless. As someone capable of certain telepathic feats, and as someone who has lived a most definitely strange life, I very much enjoyed this book. First, I loved it because his experiences are even stranger than mine, and second, because of the brilliant interpretation of why knowledge of UFOs is being blocked from us. I always believed it was because they have free energy. Well, yes, that is part of it. But it is even more because of what Mr. Swann has figured out that they have and we could develop fairly easily if

we wished - telepathy. This is a brilliant book which I predict will resound like a fine bell for centuries to come as a harbinger of the end of our imprisonment in a jail of ignorance of "WHAT IS." great book! I love Ingo . I love his sarcastic and sometimes cynical sense of humor . I love his non-chalant aproach to all the "top secret" and compartmentalized info as well as people he is always interacting with. I love those types of stories in-general. This book seems to depict a lot more than meets the eye. It not only, tells the story of Ingo's introduction to, and meeting with a figure known as "Mr. Axelrod". All the hoops he had to jump through in order to meet with him. As well as all the procedures employed by his entourage in order to keep it on the down low. However, i would say this book is more about our MOON, and all the mystery surrounding it. All the research from the earlier 20th century and how it contradicts all the current "facts" regarding it. It explains the anomalies with our moon, and all the secrecy employed by NASA about our moon. How all the current "NASA FINDINGS" with the clementine mission have been slowly but surely confirming ALL those earlier 20th century researchers who originally reported their observations of ATMOSPHERIC PHENOMENA like clouds, and mists moving over the surface as well as transient luminous phenomena. The FUN part of the story of course, is his remote viewing of the moon and what he discovered while viewing it.....as well as his "field trip" with "mr. Axelrod" Into the wilderness of Alaska in order to see a real UFO and its landing on earth to seemingly absorb water? wow. what an interesting book!

The issues he deals with are earth-shaking--that the moon is not dead, but alive with aliens, and that telepathy is key. The writing style scintillates with freshness. While exciting and absorbing like action novel, it insightfully informs us of the real contexts and mechanisms of our matrix-like, intensely information-managed society.
