# Calculus For The Life Sciences (2nd Edition)

## Synopsis

Calculus for the Life Sciences features interesting, relevant applications that motivate students and highlight the utility of mathematics for the life sciences. This edition also features new ways to engage students with the material, such as Your Turn exercises.      Note:Â You are purchasing a standalone product; MyMathLab does not come packaged with this content. MyMathLab is not a self-paced technology and should only be purchased when required by an instructor. If you would like to purchaseÂ bothÂ the physical text and MyMathLab, search for:    0321964381 / 9780321964380 Calculus for the Life Sciences Plus MyMathLab with Pearson etext -- Access Card Package    Package consists of:Â    0321431308 / 9780321431301 MyMathLab -- Glue-in Access Card    0321654064 / 9780321654069 MyMathLab Inside Star Sticker    0321964039 / 9780321964038 Calculus for the Life Sciences    Â

## Book Information

Hardcover: 896 pages

Publisher: Pearson; 2 edition (March 1, 2014)

Language: English

ISBN-10: 0321964039

ISBN-13: 978-0321964038

Product Dimensions: 8.7 x 1.3 x 10.8 inches

Shipping Weight: 4 pounds (View shipping rates and policies)

Average Customer Review:    4.0 out of 5 stars      10 customer reviews

Best Sellers Rank: #16,814 in Books (See Top 100 in Books)    #58 inÂ Books > Textbooks > Science & Mathematics > Mathematics > Calculus    #67 inÂ Books > Science & Math > Mathematics > Pure Mathematics > Calculus

## Customer Reviews

Raymond N. GreenwellÂ earned a B.A. in Mathematics and Physics from the University of San Diego, and an M.S. in Statistics, an M.S. in Applied Mathematics, and a Ph.D. in Applied Mathematics from Michigan State University, where he earned the graduate student teaching award in 1979. After teaching at Albion College in Michigan for four years, he moved to Hofstra University in 1983, where he currently is Professor of Mathematics.    Â Raymond has published articles on fluid mechanics, mathematical biology, genetic algorithms, combinatorics, statistics, and undergraduate mathematics education. He is a member of MAA, AMS, SIAM, NCTM, and AMATYC. He has served as governor of the Metropolitan New York Section of the MAA, as well as webmaster and liaison

coordinator, and he received a distinguished service award from the Section in 2003. He is an outdoor enthusiast and leads trips in the Sierra Club's Inner City Outings program. Nathan P. Ritchey earned a B.A. in Mathematics with a minor in Music from Mansfield University of Pennsylvania. He earned a M.S. in Applied Mathematics and a Ph.D. in Mathematics from Carnegie Mellon University. He is currently the Dean of the College of Science and Health Professions at Edinboro University. He has published articles in economics, honors education, medicine, mathematics, operations research, and student recruitment. Nate is a Consultant/Evaluator for the North Central Association's Higher Learning Commission and regularly participates in program evaluations. In recognition of his numerous activities, Nate has received the Distinguished Professor Award for University Service, the Youngstown Vindicator's "People Who Make a Difference Award," the Watson Merit Award for Department Chairs, the Spirit in Education Award from the SunTex corporation, and the Provost's Merit Award for significant contributions to the Honors Program. A father of four children, Nate enthusiastically coaches soccer and softball. He also loves music, playing several instruments, and is a tenor in the Shenango Valley Chorale. More information about Nate Ritchey can be found at: <http://www.as.ysu.edu/~nate/>. Marge Lial (late) was always interested in math; it was her favorite subject in the first grade! Marge's intense desire to educate both her students and herself has inspired the writing of numerous best-selling textbooks. Marge, who received bachelor's and master's degrees from California State University at Sacramento, was affiliated with American River College. An avid reader and traveler, her travel experiences often find their way into her books as applications, exercise sets, and feature sets. Her interest in archeology led to trips to various digs and ruin sites, producing some fascinating problems for her textbooks involving such topics as the building of Mayan pyramids and the acoustics of ancient ball courts in the Yucatan.

The book itself is great. But don't buy the loose-leaf. I recommend getting the hardback (used to save money). The paper that this is printed on is so flimsy, it's literally see-through. I'm so nervous about tearing it. Also, they didn't do any additional formatting to make it binder-friendly. Simply not worth it. The main thing you're paying for is the online math material, which doesn't include an easily accessible online version of the textbook. If you want that, you have to purchase it separately.

I used the text book to study and to learn the material because my teacher was little help. Book was really effective study tool

The main reason I purchased this book was to get access to MyMathLab however the code was faulty and did not work. The textbook itself is in great condition but I was really disappointed and upset with the code. However after talking with customer support, they were very efficient in working with the situation at hand. Thanks guys!

This is a good book. The examples skip vital steps that make it time consuming to figure out. Vendor sold it at a great savings and delivery was super fast.

renting makes this book so much cheaper and it looks like a new one.

It's a math textbook, what do you expect?

Good condition

The book is in excellent shape!
