ISBN-13: 978-0866224444

Product Dimensions: 1 x 10.5 x 14 inches

Shipping Weight: 4 pounds

Average Customer Review: 4.2 out of 5 stars 7 customer reviews

Best Sellers Rank: #4,321,899 in Books (See Top 100 in Books) #83 in Books > Crafts, Hobbies & Home > Pets & Animal Care > Insects & Spiders #2081 in Books > Science & Math > Biological Sciences > Animals > Fish & Sharks #25700 in Books > Science & Math > Nature & Ecology > Fauna

Customer Reviews

Book by Conkel, Donald

Best pictures and very well written. Great information on all the regional fishes and on the various morphs. Next best thing to doing the study yourself. Buy this book if you love CA cichlids.

Good book well worth it, why do I have to write a certain number of words? This isn't an English language exercise!

I love the book and it is more geared to someone who knows a little about these fish. I also have Don's first book which I do like better. These fish are hard to come by because the Aquarium shop business has been taken over by the chain stores and most of the mom and pop shops are gone. I personally had had most of Don's fish as I was once in the business many years ago. I would recommend this book to any serious Large Cichlid keeper. The fish in this book can be had with a little research.

When you read this book you will be able to tell that the author spent hours researching this

awesome species of fish.

The best part of this book is the pictures. As with many TFH books the promise exceeds the delivery. There is very little information of use to the hobbyist included in this work. So basic a fact as the size the fish reach is missing. Many of the fish shown are never or very rarely available to the hobbyist. Years ago TFH published a book, I believe the title was "The Fishes of Lake Karibi". This book had nothing to do with the aquarium hobby, but rather was a study of the commercial fishery on this lake. A hobby publisher should publish hobby books and leave text and science books to someone else. Or publish them under another name.

Contains some useful information, but TFH's "Cichlids From Central America" book, by Ad Konings, is MUCH better.

The book pictured is a large hard cover book. This book I would very much like to have several copies of, as well as the paperback that is being sold which is a different book.
