The River Of Seven Stars,

Synopsis

Arthur Friel, relentlessly curious, funded his own mission to find the white Indians of Venezuela. Along the way, he dealt with the severe tropical heat and humidity, diseases like yellow fever and beri-beri, and assorted vicious and deadly creatures packed so densely that they just about trip over each other--giant anacondas, jaguars, leaping spiders, fire ants, snakes of every description, and poisonous centipedes. Then, also, there were the Mayorunas, cannibals and headhunters who occasionally poison the streams because of "real or imaginary enemies." Friel found the white Indians, but they were not what he expected. He made it home and became one of the most popular writers for Adventure magazine during the 1920s and 1930s. --This text refers to the Paperback edition.
