PHILLIP E. PACK, Ph.D., has taught AP Biology and gifted programs for almost 20 years. He is an Assistant Professor of Math and Science at Woodbury University in Burbank, California.

Currently studying for the DAT and this book couldn't help me review for Biology any better.

Great book but the kid did not use it much, he used it more to study whatever he got wrong in practice tests. Will see how the test came out in a month!!

I was expecting a change for the 5th edition. However, when compared to the 4th edition, it is nearly identical. Stick to the 4th edition if you already own it.

Would recommend it to anyone taking the AP Biology test.

Good

It helps my son's AP test.

Very helpful review book for those that are crunch-studying. Loved how concise the information in this book was, and liked the practice questions that were listed at the end of each chapter. It's the best AP bio review book in my opinion--you won't regret it!

As rated by a number of 11th graders, best study guide for AP Biology. Breaks down the test questions to a reasonable level.
