# River Running

## Synopsis

\* Written by the granddaddy of the river running world\* Completely updated, with new text and photos\* Sidebars describing real-life river running situations threaded throughout First published in 1975, River Running inspired a whole generation of river runners. Now this classic text is back in print in a completely rewritten and updated guide. Reflecting changes in the regulations, equipment, and popularity of the sport, River Running introduces the modern river runner to craft and gear, technique, planning and preparation, health and safety, environmental issues, and basic river sense. Long-time expert Verne Huser shares his insights on the nature of rivers-how they act, why they flood, and what to look for when scouting out rapids, holes, and other obstacles-and discusses how to choose from the many types of craft, from traditional wooden canoes to inflatable kayaks and catarrafts. Also covered are the different means of propulsion and the latest in safety equipment. All information is presented in the context of running rivers safely, with as little impact on the river environmental as possible. --This text refers to the Paperback edition.

## Customer Reviews

Verne Huser's River Running has been an eye-opener for canoeists, kayakers, and rafters. (The Olympia, Olympia, WA)With 40 years of paddling experience under his lifejacket, Verne Huser an Old Man River himself ... captures the ins and outs of river running better than anyone. (Eugene Buchanan, Publisher, Paddler magazine)A classic when it first appeared twenty-five years ago, this updated edition only adds to the luster of River Running. Huser is a fabulously knowledgeable and experienced guide, and his definitive book is an absolute joy to read. (Ann Zwinger, author) --This

Out of date, nothing new. I was very disappointed in this book. The information is the same as are the photos as the first edition 20 years ago. There are too many other books on the subject to waste your time with this one.

Excellent Book!
