Customer Reviews

Bought for Anatomy class and very happy I did. It is very detailed and the photos and colors are vivid and labeled well. It is an excellent study tool. I 3-hole-punched mine so I could put it in a binder. That was very helpful to me. I would recommend this for anyone studying Anatomy, or even Physiology, especially for the price.

Very Helpful! I've been a nurse for 12 years, and specializing in cardiology for 2 years. This will help me feel more confident and be handy for everyone on our staff- I'm keeping it at my desk for everyone's reference. Thanks! *Fast Shipping!*

These charts have come in handy as a quick reference for my medical coding job. Knowing things like positions of veins changes the codes I can use. I have about 15 such charts and use them at least once a day for coding when I need anatomical clarification. Totally worth the \$

I am a medical coder and these are a perfect for a quick desk reference!! They are awesome!!!

excellent charts for an anatomy class

All these charts are very clear and are a quick reference to see all the parts of the body right away. I use it extensively when I am preparing for a medical conference or during the conference. In my job as an interpreter I am always looking for easy ways to get prepared for a conference. This is great.

I gave it four stars only to the poor sap who had to map all this crap in the human body and then write about it. That guy deserves a night on the town!

I am taking a Clinical Foundations course and these quick study guides are a must have. They are accurate, detailed, and (with the pre-punched holes) fit nicely in a binder. The lamination ensures that they will last a long time. I am quite pleased.
