Daily Science, Grade 3 (Daily Practice Books)

Synopsis

Fit standards-based science instruction into your curriculum! Help your grade 3 students develop a genuine understanding of standards-based scientific concepts and vocabulary using the 150 engaging activities in Daily Science! A variety of rich resources, including vocabulary practice, hands-on science activities, and comprehension tests in multiple-choice format, help you successfully introduce students to earth, life, and physical science concepts.

Book Information

Series: Daily Practice Books

Paperback: 192 pages

Publisher: Evan-Moor Educational Publishers; Tch edition (January 1, 2009)

Language: English

ISBN-10: 1596734213

ISBN-13: 978-1596734210

Product Dimensions: 8.3 x 0.6 x 10.7 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars 30 customer reviews

Best Sellers Rank: #22,055 in Books (See Top 100 in Books) #28 in Books > Education & Teaching > Schools & Teaching > Instruction Methods > Science & Technology #40 in Books > Office Products > Educational Supplies > Teaching Materials > Professional Development Resources #108 in Books > Education & Teaching > Studying & Workbooks > Workbooks

Age Range: Baby and up

Grade Level: 3 and up

Customer Reviews

I purchased this for my 3rd grade homeschooled son. We started the year using a popular christian science curriculum as we had the previous year. By half way through it was just too much on one topic and he really wanted to branch out into a variety of science topics. This book came highly recommended by a friend and after reading the description I thought it might be just what we were looking for. The book is well made and has great instructions. Each day there is a short reading passage, a few vocabulary words, and then some questions. It is just enough to keep his interest but not too much that it takes up a large chunk of our day. Already he has asked to work ahead when he gets excited about the topic. We use it in book form but it does have perforated pages if someone wanted to tear out the daily sheet. There are 6 'big ideas' that are then broken down into

weekly subset topics. The main ideas covered are living thing adaptations, plants, fossils, air, light, and electricity. This book has been a big hit for student and teacher alike!

As a busy homeschooling mom of multiple children, these Evan Moor Daily Science books are a lifesaver. We're technically following a chemistry course this year, but there isn't time for it daily. My kids love science, and so these books serve the purpose of exposing them to a little each day. Every week there is a new "BIG IDEA" question, with non-fiction passages, questions, and activities built into manageable daily assignments, with review every few weeks.

I was surprised by how much I liked this book (but then, all Evan Moor products are so good.) I printed off the units and made little books that we used whenever I needed a 15 minute time filler. The best feature is the emphasis on the vocabulary words. I believe if the kids know the vocabulary, they will do much better on our standardized test. My only "con" is that this book just doesn't cover enough topics - no simple machines, no planets, no rock cycle. I like the depth, but not the breadth. I plan to get Daily Science Grade 4 for some of these topics.

Great for homeschooling. We're using this as a supplement for my daughter's textbook that she finished before the year was over. You can do one page per day, because each topic is 5 days long. However, my daughter usually finishes the whole 5 days worth in one sitting, which is fine because I'm not trying to stretch this out for the whole year (only until June). I will be ordering more Evan-Moor items next year as supplements.

Very nice lay out, easy to use. A page a day to help prevent burnout. Great foundation to build on for home school needs. Will be ordering other subjects.

The kids LOVE this because it has interesting topics that they want to learn about! I use it as part of my morning routine, and still do regular science from our text book later on. I highly recommend this book to anyone trying to get their kids interested in reading and science!

Our family homeschools. I bought this book for my daughter (9yo) after tossing our Apologia science. She absolutely loves it and can't wait to do our lessons each day. I really enjoy each weekly lesson also! We will do this same science next year too!

Great book! Love this publishing company
