# Managerial Accounting: An Introduction To Concepts, Methods And Uses

## Synopsis

This classic MBA text balances managerial accounting coverage with a strong emphasis on management decision-making. Core managerial accounting concepts are combined with the latest cutting-edge material important to today's managers and decision makers. International issues within today's globalized business environment, the strategic effects of decisions, a focus on ethics that reflects this area of increasing scrutiny, and emphasis on new management accounting trends are highlighted. Numerous realistic examples and application problems emphasize process improvement and the integration of financial reporting issues for management decision-making. Managerial accounting tools help users understand the emerging service sector, government, and nonprofit organizations for ongoing business success.

## Book Information

Michael W. Maher, Ph.D., is Professor of Management and Accounting and Associate Dean for Faculty at the Graduate School of Management at the University of California, Davis. He received his bachelor's degree in accounting from Gonzaga University and his MBA and Ph.D. from the University of Washington (Seattle). He has experience in public accounting, has co-managed his own business, and consulted with numerous companies and governmental bodies. Dr. Maher is active in the Management Accounting Section of the American Accounting Association, including service as president. He has co-authored numerous books and published articles in numerous journals.

Clyde P. Stickney is the Signal Companies' Professor of Management, Emeritus at the Amos Tuck School of Business Administration, Dartmouth College. He received his DBA from Florida State University and taught at the University of Chicago and the University of North Carolina at Chapel Hill before joining the Tuck School in 1977. He has also taught at business schools in Japan, Australia, Finland, and Germany. Prof. Stickney has authored and coauthored books on financial accounting, managerial accounting, and financial statement analysis.

Roman L. Weil, Ph.D., CPA, is the V. Duane Rath Professor Emeritus of Accounting at the University of Chicago and has within recent years been Visiting Professor at the Haas School of the University of California, Berkeley; Carnegie Mellon University; Harvard Law School; Princeton University; and New York University. He has designed and implemented continuing education programs for partners at two of the large accounting firms and for employees at several operating corporations. Dr. Weil has co-authored dozens of books. His lay articles have appeared in Barron's and The Wall Street Journal. He has published more than 80 articles in academic and professional journals, most recently on financial literacy for corporate governance and on the exposure of wine snobbery.

This book contained very good example problems, exhibits and case studies. They assisted me with passing my MBA course; however, this text was one of my least favorite books. The flow of the material was 'choppy', lacked congruence and was very sterile in its presentation. However the text was required for my course. While I read the assigned material, it helped me tremendously to supplement my reading with other Managerial Accounting textbooks.

The seller clearly didn't describe this book as well used. As for the text and material covered it served it's purpose.

Help with my higher education!

awesome

It's about what you'd expect from a college course textbook.

No issues

Hard to read, does not have enough sample problems. This text book is for people with an account background as an undergrad. If your undergrad is not accounting, this book does not provide the foundational material that would allow you to read it! To clarify, I did take two undergrad accounting course and to well in both and felt I mastered the material. This book was just to advance and hard to read! Worthless!

Just used for school. It was extremely helpful.
