PreSchool-This lift-the-flap adventure is an introduction to various body parts, with fingers behind mittens, toes inside boots, two ears under a hat, etc. A multicultural crew of children with playful expressions on their faces is dressed in jeans, a coat, even sunglasses decorated in bright polka-dotted, striped, and flowery patterns; colors include hot pink, sunshine yellow, spring green, and ruby red. A cheerful board book to use with lapsit and toddler storytimes. Olga R. Kuharets, Broward County Libraries, Fort Lauderdale, FL Copyright 2003 Reed Business Information, Inc.

My one year old grand daughter loves this book and she has many books. Yes, some flaps have torn, but they were torn with love and use and I think any child that enjoys the peek a boo type book would enjoy this one as well. She particularly likes the teeth and tongue flaps and I like the elbow and knee pages since you don't often see those parts mentioned.

Really enjoyed the where is my belly button book. Bought this thinking that it would be very similar. However this book introduces different body parts such as the knee and elbow. Little too advanced and not as interesting for my 13 month old. She will still lift the flaps but not a huge fan yet. I'm sure she will enjoy it more when she is a little older.

My 11 month old granddaughter is getting ready to start physical and occupational therapy to help her catch up after an illness and surgery. I was looking for books that would help her - not only to just entertain her but help with this process. This is a great book for any young child and I am thrilled to find it for my granddaughter.

My baby loves this. Although its a board book the flaps are thin cardboard which my 14 month old has ripped off several times. Not as sturdy as a regular board book. Having said that she really likes this book

These are so much fun to read with our little one. He loves the interaction of the lift the flap as we turn each page and he learns something new each time we read to him. You will love this!

Absolutely love this book. I also bought where's baby's belly button but for my almost 17 month old this one is perfect. She has learned back, knees, elbows and tongue. Reading this to her is so much fun. Highly recommend.

This is supposed to be a flap book and over 90% of the flaps were completely torn off. WORST condition!!! Not even exaggerating one bit. I am usually not to leave negative comments, but I was

really looking forward to reading my son this book, and he loves to lift the flaps. SOOO DISAPPOINTING!!! Not sure who would ever sell a book in such condition. That is just cruel.

this book is wonderful for introducing your babe to popular body parts...and the clothing that usually go with them where applicable. it highlights hands and gloves, feet and boots, ears and hat, scarf and nose, shirtsleeves and elbows, jeans and knees, coat and back and belly button, mouth and teeth and tongue, and glasses and eyes. it is manageable for the little hands to turn the sturdy board pages and raise the flaps (some flaps raise up and some fold down).educational, short, interesting and colourful..winner in my book!
