Customer Reviews

I have emailed the company twice that the tests are not grading correctly, there is a system glitch. When the question has multiple answers, the company only has one answer built, not both answers, causing you to get the question wrong. Other questions, require you to have your first character capitalized or it is marked wrong (example Z11.0, if you type z11.0, it is wrong). The book is good, I'm going to have to use the workbook, cause the online product is horrible.

Good

had this book at a really great price, compared to the bookstore. It was brand new, and it is easy to understand. I like the exercises throughout the chapters to help cement the concepts being taught.

Excellent step by step. Easy to follow

excellent
