Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

In this digital age, when we rely on Google Maps, whether on our phones or on our tablets, to get us from point A to point B, one might argue the usefulness of an old-fashioned fold-up map. We reside in Oregon, and a few weeks ago we took our first-ever trip to Maine. In preparation, we bought this map of Maine, which is published by the National Geographic Society, and we took the map along with us. Sometimes you just need the big picture, all in front of you, all at once. The map was a HUGE help to us as we navigated the beautiful Maine coast, then the central part of the state. It's also waterproof, which was a bonus, as it got rained on once! Highly recommend!

I have always depended on National Geographic hiking maps and just anticipated that the size of this map of Maine would be similar. I should have looked more closely to the size listed, especially after seeing one comment that discussed the size. In fact, they are right. It is a smaller than a usual road map and it is very hard to read. It will be useful but a map from an interstate highway visitor's center would probably be better.

Exactly what I want in a map, waterproof and tear-resistant, great to keep in your backpack or in your car. Used for traveling in the state, shows majority of the roads I need to plan routes when there's no cell phone reception. Very useful in the northern points.

great now I need one for each state I plan to visit

I love NG maps.

Nice detail

Too small a scale. Not as good as a road map from AAA.

Very helpful for our 5 day road travel in the State of Maine.
