Customer Reviews

Jennifer Coleman Dowling Jennifer has an M.F.A. in Visual Design and is an experienced new media specialist, educator, and artist. She is currently a tenured professor in the Communication Arts Department at Framingham State University where she teaches courses in digital media and design using Adobe software. Ms. Dowling has worked on web design, interactive multimedia,

animation, print design, illustration, logo and corporate packaging, educational software, advertising, product promotion, and presentation graphics.

Bought the book for a class and it served its purpose well.

Book came brand new! Loved it! Very fair price and awesome condition! Would buy again!

Quite a bit to get across, but well presented. It certainly covers the key concepts and topics well. A good textbook.

Cheap, brand new, and fast shipping! Thanks :)

This is the one i looked for beginning the It course.The only thing about it is that has a few pictures in it.Good quizzes.

A book packed full of information and concepts, including the background and history of multimedia. Whether you're a beginner or more advanced this book has something for everyone. For me it was a great refresher on topics from software to typography, and everything in between. I enjoyed that the book used easy to understand terminology, clear definitions, and detailed examples and explanations. An added bonus from the book is the Still Struggling, Tip and Quiz sections. A great addition to my personal and professional library

This is a very informative, yet easy to read book. For someone who knows next to nothing about computers, the easy to understand terminology used is great for me. Definitions are very clear and specific. There is a lot of information packed into this little book, I think it would be helpful even to those who already know something about working with computers. Illustrations are also very helpful! Highly recommended for everyone who works with computers and graphic design!
